Production Management: *PlantPAX*

PlantPAX
Process Automation System

**Rockwell
Automation**

Purpose

- PlantPAX™ is the process automation system from Rockwell Automation with all the core capabilities expected in a world-class distributed control system (DCS).
- The system is built on a standard-based architecture using Integrated Architecture components that enable multi-disciplined control and Premier Integration with the Rockwell Automation Intelligent Motor Control portfolio.

Function

- Scalable and flexible architecture
- Plant-wide control and optimization
- Unified IT infrastructure using EtherNet/IP

Application

- Engineering Workstation (EWS) Contains all the necessary software to fully configure the control and visualization components of the PlantPAX process automation system.
- Operator Workstation (OWS): Consists of the software needed for visualizing and controlling the process.
- Process Automation System Server (PASS): Provides central name resolution and look-up services across multiple computers for central administration of data throughout the PlantPAX process automation system. The PASS also provides data, HMI and alarm server capability.
